

Cookies

This website uses cookies to improve your user experience. By accepting and closing the cookie information banner when first visiting the page you consent to our use of cookies when scrolling the front page, clicking on a link or continuing to navigate in other ways.

What are cookies?

A cookie is a small text file that a website saves on your computer or mobile device when you visit the site. It enables the website to remember your actions and preferences (such as login, language, component settings) over a period of time, so you don't have to keep re-entering them whenever you come back to the site or browse from one page to another.

How do we use cookies?

We use cookies as described:

When accepting the cookie consent information when first visiting the page, a cookie is stored so that it does not reappear.

When the "save password" checkbox is marked in the login component, the username and password is stored.

Session cookies so that you stay connected to our site when you log in.

Storing the language edition you select on montelnews.com.

When logged in to energymarketprice.com , most of the preferences you select in components (graphs, price views, news views) are stored for later use when you visit the page.

MIG collects information about visitors on our site using Google Analytics. The purpose of this is to prepare statistics to improve and further develop the website. Examples of what the statistics give us answers to are: how many people visit different pages, how long do the visits last, where do website users come from, and what browsers are used. The information is processed in an unidentified and aggregated form. An unidentified form means that we cannot trace the information we collect back to the individual user.

How to control cookies

You can control and/or delete cookies as you wish – for details, see aboutcookies.org. You can delete all cookies that are already on your computer and you can set most browsers to prevent them from being placed. If you do this, however, you may have to manually adjust some preferences every time you visit a site and some services and functionalities may not work.
